Pharmacotherapy Principles and Practice - 4th Edition (2016)

There is an epidemic of overweight (body mass index [BMI] of 25 kg/m² or higher) and obesity (BMI of 30 kg/m² or higher); however, patients with severe mental illnesses (eg, schizophrenia, bipolar disorder) have an even greater risk of weight gain and obesity than the general population. In fact, this risk may approach two-fold; up to 60% of patients with severe mental illnesses may be obese.
