I have a 2013 ram 1500 2 wheel drive. with the 5.7 hemi. I think it has VVT. It idles fine. But when under a load it has a bad miss, until it levels out then again runs fine. It is sending a code that #4 cyl. is misfiring. I have changed the coil, plugs, and injector. Is this a prob. with the VVT? Or the Valves?

Hey all I have this truck in the shop setting misfire codes . Scan data shows cylinders 5,6,7and 8 misfiring and they must be because this thing idles rough . Doing some testing we found no coil current and no injector current for the cylinders that are misfiring . If the codes are cleared the engine runs and idles smooth on all 8 cylinders , the longer it runs cylinder 5 will start to misfire ...

### **Cylinder 3 Misfire Nightmare | DODGE RAM FORUM**

We have a 2006 Dodge Ram 1500 with the 5.7 Hemi. The initial complaint was intermittent popping (intake area) and misfire. We scanned the vehicle and got the same code. We tested coils and found that number 4 coil was questionable. Due to the mileage (160,000) we replaced all 8 coils and 16 spark plugs. The problem was not cured.
