The difference between economic theory and reality. Over mathification of economics comes with many problems that I illustrated in my previous post. Over mathification implies that the person doing the calculations is able to have perfect information or at the least enough information to make your calculations.

### The difference between economic theory and reality.

Keynesian economics is a theory that says the government should increase demand to boost growth. Keynesians believe consumer demand is the primary driving force in an economy. As a result, the theory supports the expansionary fiscal policy. Its main tools are government spending on infrastructure, unemployment benefits, and education.

In economics, the Laffer curve, popularized by supply-side economist Arthur Laffer, illustrates a theoretical relationship between rates of taxation and the resulting levels of the government's tax revenue.The Laffer curve assumes that no tax revenue is raised at the extreme tax rates of 0% and 100%, and that there is a tax rate between 0% and 100% that maximizes government tax revenue.

### Laffer curve - Wikipedia

We show how theory and practice of ecosystem services since the 1990s have operated primarily within the exchange value framework settled by the Neoclassical economic paradigm. In the light of this historical review, part three discusses critically trends towards monetization and commodification of ecosystem functions taking place as ecosystem-service research unfolds.

### A step into the unknown putting theory in practice

The theory and practice of local economic development has undergone a transformation in the United States over the past ten years. Instead of an emphasis on attracting outside investment in manufacturing, the new theory concentrates on enhancing a local community's ability to create and retain employment from within.
