An economic system, or economic order, is a system of production, resource allocation and distribution of goods and services within a society or a given geographic area. It includes the combination of the various institutions, agencies, entities, decision-making processes and patterns of consumption that comprise the economic structure of a given community.

### Economic system - Wikipedia

California's current standards have not been updated since 1998, and while still thorough, they are missing recent scientific advances, and the state is eager to update them to match current knowledge. Additionally, a large part of the economy in California is based on science, technology, and engineering businesses and industries.
