Slipping Overdrive

"Slipping" is the sensation that your transmission isn't connected to your engine when you press the accelerator. This happens in manual transmission vehicles when the clutch wears out and loses grip intermittently. The F-150's transmission has been automatic only since 2004, but "slipping" still happens for a number of reasons.

Slipping Overdrive

I have a 2004 Ford F150 (75,000 miles) and I have a problem with my transmission slipping. With the Overdrive "on", it shifts from 1st and 2nd gear with no problem. But when it goes into higher gear (3rd and on) the transmission won't engage and the engine rev's. When I turn the Overdrive "off", it shifts in all gears without any
