Within the confines of the classroom, conflict is considered to be a form of incivility, which Patrick Morrissette... everyday experiences to their classroom behavior. The model prescribes how teachers may approach conflicts in their classrooms through mediation, role-playing, problem solving, and conflict-resolution protocols. The model includes a 5-step process that teachers can follow to address conflicts. It suggests that teachers first provide a clear explanation of the conflict, then facilitate a discussion, and finally offer guidance and support to help students resolve the conflict. The model is designed to be adaptable to different classroom contexts and to encourage collaborative problem-solving among students. It is also intended to be inclusive of diverse perspectives and to promote equity and social justice in the classroom.
