Forces are all around us and affect everything we do, with that in mind we've put together a collection of ideas for learning about forces and motion with a fun forces experiment for everyone from preschoolers to grown ups. We've got friction experiments, gravity experiments, air resistance experiments and lots more!

Forces and Motion Experiment Ideas - What is a Force?

The Force and Motion Interactive E-book* explores the effects of forces on the motion of objects for both a conceptual and real-world understanding, using common, observable examples, like running, billiards, and motion of vehicles. Learn about concepts such as constant motion, acceleration, speed and direction, as well as a discussion of Newton's Laws of Motion.

Force and Motion (Student Edition) | National Science ...

Forces influence objects that are at rest or that are already in motion. Isaac Newton's three laws of motion describe how forces interact with objects to influence motion. These laws involve inertia, mass, velocity, and momentum. Key forces include gravity, friction, and magnetism. A force is required to do work, and generating a force requires ...
