SUPER API ROBOT

Robotics API applications can run on any Java-capable operating system on any hardware, as long as it can communicate with the RCC via network. For simulation purposes, and to control devices that do not require hard real-time control, a Java implementation of a Robot Control Core is bundled with the Robotics API 2.0. Getting started

robot.api.deco module¶
robot.api.deco.keyword (name=None, tags=()) [source] ¶ Decorator to set custom keyword names and tags to functions and methods. This decorator creates the robot_name and robot_tags attributes on the decorated keyword method or function. Robot Framework checks them to determine the keyword's name and tags, respectively.

robot.api package — Robot Framework 3.0 documentation

Volume 4 of "The rules governing medicinal products in the European Union" contains guidance for the interpretation of the principles and guidelines of good manufacturing practices for medicinal products for human and veterinary use laid down in Commission Directives 91/356/EEC, as amended by Directive 2003/94/EC, and 91/412/EEC respectively.
