Now Build and run the project. Drag the slider... the text should change size as you drag. The above line implements the action. It is called whenever the slider is dragged to a new position, and sends a message to its own `setText:withSize:` method, passing the existing text (`[self text]`) and a size which is obtained from the slider's value itself. We set up the range of values in IB to be from ...

Programming Mac OS X, A Guide for UNIX Developers Kevin O'Malley; Manning; 1930110855; The intent of this book is to introduce Unix developers to Mac OS X. As such, I think it does a pretty good job. It doesn't go in to great depth; for example another reviewer complained about its lack of coverage for Carbon or mixed mode programming.
