Hello. I recently got an EF 50mm 1.8 lens for my EOS 60D. The automatic focus appears to be fine but turning the focus ring while in manual does not change focus at all. I've made sure that the lens is set to "MF" and I can see "M FOCUS" on my top display. I tried the lens on another camera and it...

Solved: EF 50mm 1.8 Manual Focus not Responding - Canon ...

However, there are times when manual focus is indeed your best option. Autofocus in Canon DSLRs works well when there is enough contrast (the difference between light tones) on or between subject matter that the camera is able to detect. There are times when subject matter lacks enough contrast for the autofocus to work properly, leaving you with a lens—and really a camera—searching for focus.

3. Autofocus vs. Manual Focus | Top Seven Considerations ...

The Sony introduced a whole new dimension to manual glass, focus magnify without requiring a magnifier was a godsend for me and I eventually sold off my Canon bodies in favour of the Sonys. One of the really nice features of the A7R2 was that it stabilized the magnified image in the viewfinder, this feature was fantastic especially when shooting lenses like the Zeiss 135 APO in magnified view.

Canon EOS R with manual only lenses - FM Forums

The Canon RF lenses are huge, heavy, and so expensive. So when I saw a 50mm range lens that was a native RF mount for so little, I had to try it! I come from a film photography background, starting with manual lenses on the good old Canon AE1 (if you don't know this camera look it up!). Over the years I have moved to digital with fully auto lenses.
