Martin SF36

The SF-36v2® Health Survey is a multipurpose, short-form health survey with 36 questions that yields an eight-scale profile of functional health and well-being, as well as two psychometrically based physical and mental health summary measures and a preference-based health utility index.

PART I: INTRODUCTION - Optum

Criterion validity is presented in the SF-36 manual for all dimensions except vitality and social functioning. Each scale reportedly provides a valid representation of the criterion to be measured (Ware, 1993). The SF-36 has been linked to utilization of health care services, clinical course of depression and five-year survival (Ware, J. E 1996).
