Learning Neural

Neural networks and deep learning

Deep learning is a subset of machine learning where neural networks — algorithms inspired by the human brain — learn from large amounts of data. Deep learning algorithms perform a task repeatedly and gradually improve the outcome, thanks to deep layers that enable

Read Online Neural Networks

And Deep
networks are distinguished from the more commonplace single-hidden-layer neural networks by their depth; that is, the number of node layers through which data must pass in a multistep process of pattern recognition.

A Beginner's Guide to Neural Networks and Deep Learning

...

In five courses, you will

Read Online Neural Networks

learn the foundations of Deep Learning, understand how to build neural networks, and learn how to lead successful machine learning projects. You will learn about Convolutional networks, RNNs, LSTM, Adam, Dropout, BatchNorm, Xavier/He initialization, and more.

**Neural Networks and
Deep Learning |
Coursera**

Read Online Neural Networks

The purpose of this free online book, *Neural Networks and Deep Learning* is to help you master the core concepts of neural networks, including modern techniques for deep learning. After working through the book you will have written code that uses neural networks and deep learning to solve complex pattern recognition problems.
