Most of the Maths comes from the Maths Workbook, which can actually be found online. In truth, as far as the actual Maths goes, it's mostly similar to A-Level, with the exception of multivariable calculus/partial differentiation. An introduction to partial derivatives from the Oxford PPE Maths Workbook. However, there is a lot of new applications. Instead of abstract mathematical functions, we are now looking at supply and demand curves:

Mathematicians have always been fascinated by numbers. One of the most famous problems is Fermat's Last Theorem: if  $n \geq 3$ , the equation  $x^n + y^n = z^n$  has no solutions with  $x, y, z$  all nonzero integers. An older problem is to show that one cannot construct a line of length  $3\sqrt{2}$  with ruler and compass, starting with a unit length. Often the solution to a problem will require you to think ...
