Pajero 6g72 Engine

The 6G7 series or Cyclone V6 engine is a series of V6 piston engines from Mitsubishi Motors.Five displacement variants have been produced from 1986 to present day, with both SOHC and DOHC, naturally aspirated and turbo charged layouts.While MIVEC variable valve timing has also been implemented in some versions the 2.5, 3.0 and 3.5 L versions were also available with gasoline direct injection.

Mitsubishi 6G7 engine - Wikipedia

It is a V-shaped cast iron six-cylinder engine that has a 60-degree camber. The cylinder head of the 6G72 engine was made of aluminum, which made it possible to significantly lighten this power unit, improving the temperature resistance. Popular was the 3.5-liter 6G74 engine, which was an exact replica of the base model with bored cylinders.
