Religion Economy And Cooperation Religion

Both religion and economics are analyzed as social institutions that support human intra-group cooperation. Even if individuals are rational maximizers of personal utility, they yet must take into account the reciprocal nature of human relationships.

Religion, Economy, and Cooperation | De Gruyter

Abstract. We analyze the relation between religious beliefs, religious participation, and social cooperation. We focus on religions that instill beliefs about the connection between rewards and punishments and social behavior. We show how religious organizations arise endogenously, and identify a "spiritual" as well as a "material" payoff for being religious.

Religious Beliefs, Religious Participation, and Cooperation

Whether religion can be considered an ultimate cause or an epiphenomenon of more fundamental differences, religion and conflict appear to be correlated. On the other hand, religion also serves as a source of cooperation and peace within religious communities. The article examines this dual nature of religion—as a possible source of both conflict and cooperation.

Religion and Economy Rachel M. McCleary and Robert J. Barro Religion has a two-way interaction with political economy. With religion viewed as a dependent variable, a central question is how economic development and political institutions affect religious participation and beliefs. With religion viewed as an independent variable, a key issue ...

Religion and Economy - American Economic Association

The economics of religion concerns both the application of economic techniques to the study of religion and the relationship between economic and religious behaviours. The relationship between religion and economic behaviour was first identified by Max Weber who attributed the modern advent of capitalism to the Protestant reformation. Adam Smith laid the foundation for economic analysis for religion in *The Wealth of Nations* stating religious organisations are subject to market forces, incentive

Economics of religion - Wikipedia

Religious economy refers to religious persons and organizations interacting within a market framework of competing groups and ideologies. An economy makes it possible for religious suppliers to meet the demands of different religious consumers. By offering an array of religions and religious products, a competitive religious economy stimulates such activity in a market-type setting.

Theory of religious economy - Wikipedia

Since the beliefs are the output of religion sector and church attendance is the input, higher attendance symbolize more input to religious sector and a push to economic growth. This paper makes following contribution to the literatures.
