STAAD Foundation Advanced will use the imported geometry and support reactions to design a mat foundation for the structure. You can only import a STAAD.Pro model that has been successfully analyzed, because you will want to have the support reactions available for the foundation design.

### Mat Foundation Example - Bentley

The STAAD.Pro graphical user interface (GUI) is normally used to create all input specifications and all output reports and displays. These structural modeling and analysis input specifications are stored in STAAD input file - a text file with extension, .STD. When the GUI opens an existing model file, it reads all of the information necessary from the STAAD input file.

### Technical Reference of STAAD Commands - Bentley

STAAD.Pro is a general purpose structural analysis and design program with applications primarily in the building industry - commercial buildings, bridges and highway structures, industrial structures, chemical plant structures, dams, retaining walls, turbine foundations, culverts and other embedded structures, etc.
