Charles Darwin - Charles Darwin - On the Origin of Species: England became quieter and more prosperous in the 1850s, and by mid-decade the professionals were taking over, instituting exams and establishing a meritocracy. The changing social composition of science—typified by the rise of the freethinking biologist Thomas Henry Huxley—promised a better reception for Darwin.

Charles Darwin - On the Origin of Species | Britannica

This film explores the epic voyages of Darwin and Wallace that led each to independently propose the natural origin of species and formulate the theory of evolution by natural selection. Up until the early 1800s, most people, scientists included, believed that every species was specially created by God in a form that never changed.
