Perfect competition describes a market structure, where a large number of small firms compete against each other. In this scenario, a single firm does not have any significant market power. As a result, the industry as a whole produces the socially optimal level of output, because none of the firms can influence market prices.

### The Four Types of Market Structures - Quickenomics

The events of September 11 have had some of their worst economic effects on the airline industry, leading to a dramatic fall-off in passenger demand and substantially higher costs. But even before that day, the industry was facing bad times, with few airlines anticipating profitable performances in 2001. Some have argued that deregulation has contributed to the industry's problems, and ...
