vSAN ReadyNode™ Sizer - VMware

This ReadyNode is supported by VMware, however it can no longer be ordered from HP/HPE. (*)The 779168-B21 is under review for vSAN 6.5 ReadyNode listing and not yet completed. Please use 822555-B21 instead for this ReadyNode with vSAN 6.5. For other vSAN releases, you can choose any HPE drive that is listed.

VMware Compatibility Guide - vsan

VMware vSAN is a hyper-converged, software defined storage platform that is completely integrated with VMware vSphere. vSAN aggregates locally attached disks from the hosts participating in the vSphere cluster, creating a distributed shared vSAN datastore. vSAN is the first policy driven storage solution from VMware that is designed for simplifying storage provisioning and management in vSphere environments.

VMware vSAN on Dell EMC PowerEdge Servers Getting Started ...

Virtual SAN™ Ready Nodes from Cisco, Dell, Fujitsu, and Supermicro are now available. Robin Liongposted March 6, 2014. 0Comments. With the Launch of Virtual SAN™ (see www.vmware.com/nowfor replay if you missed it), VMware announced two ways that customers can build and deploy a Virtual SAN™ node: 1) Choose from recommended list of Ready Node configurations.

VMware Virtual SAN Ready Nodes - VMware vSphere Blog

Dell EMC vSAN Ready Nodes are flexible, pre-configured, and jointly certified PowerEdge servers that are like HCI building blocks for vSAN. They can reduce deployment risks, improve storage efficiency, and quickly and easily scale as needed. Dell EMC vSAN Ready Nodes offer several key benefits for customers, including the following:

Chart a Better IT Future With Dell EMC PowerEdge and VMware

Customers have had two choices for HCI in their private data centers: vSAN ReadyNodes, or jointly-certified servers, and a jointly engineered system, Dell EMC VxRail. vSAN ReadyNodes offer customers the greatest deployment option flexibility to build an HCI cluster that meets their specific needs, with over 15 server OEMs offering over 500 ReadyNodes, from hybrid to all-flash to all-NVMe servers with various levels of compute performance.
