### Why Do Elephants Need The

As icons of the continent elephants are tourism magnets, attracting funding that helps protect wilderness areas. They are also keystone species, playing an important role in maintaining the biodiversity of the ecosystems in which they live. During the dry season, elephants use their tusks to dig for water.

### Why Elephants are Important - Save the Elephants

Elephants need extensive land areas to survive and meet their ecological needs, which includes food, water, and space. On average, an elephant can feed up to 18 hours and consume hundreds of pounds of plant matter in a single day. As a result, as they lose habitat, they often come into conflict with people in competition for resources.

### Elephant | Species | WWF

Elephants have long eyelashes to help avert blowing sand, dirt, and debris from the eyes. In addition to the upper and lower eyelids, elephants have a "third eyelid" which moves vertically across the eye. These eyelids function to protect the eye when feeding, bathing, and dusting (cooling down). Refer to behavior section.

### All About Elephants - Senses | SeaWorld Parks & Entertainment

Elephant, largest living land animal, characterized by its long trunk, columnar legs, and huge head with temporal glands and wide, flat ears. Elephants are grayish to brown in color, and their body hair is sparse and coarse. They are found most often in the savannas, grasslands, and forests of Africa and Asia.

### elephant | Description, Habitat, Scientific Names, Weight ...

Elephants live in hot conditions and need to be able to cool themselves down. Since they're unable to sweat, they've adapted another solution. They flap their large ears to help cool the blood in their capillaries and distribute the cooler blood through their bodies. This process can lower their blood temperature by more than 10 degrees Fahrenheit.

### The Adaptations of Elephants for Survival | Animals - mom.com

One of the biggest threats to elephants in the wild is the continually destruction of their natural habitat. This gives them less room to roam in order

## Where To Download Why Do Elephants Need The Sun Wells Of Knowledge Science

to find adequate supplies of food. They can consume more than 50 tons of food per day so they need quite a selection of it to choose from.

### **Elephant Habitat » Elephant World**

Tree bark is a favorite food source for elephants. It contains calcium and roughage, which aids digestion. Tusks are used to carve into the trunk and tear off strips of bark. Elephants require about 68.4 to 98.8 L (18 to 26 gal.) of water daily, but may consume up to 152 L (40 gal.).

### **All About Elephants - Diet & Eating Habits | SeaWorld ...**

Elephants appreciate cooling off in bodies of water and may enjoy a good romp in the water with their pals. Elephants are strong swimmers, so being in the water is not unfamiliar to them. In the water, they can enjoy cooling down while "wrestling" with their friends and members of their herd.

### **What Do Elephants Do for Fun? | Animals - mom.com**

Elephants are incredible creatures. The largest land mammals on earth, they show a wide range of behavioral and emotional patterns in their up-to-60-year lifespans.

Why Democrats are donkeys and Republicans are elephants Written by Jackson Arn, Artsy This article was published in partnership with Artsy, the global platform for discovering and collecting art.

### **Why Democrats are donkeys and Republicans are elephants ...**

The Asian elephant is smaller than the African elephant. Asian elephants live in jungle habitats. It's entirely different than the deserts of Africa. Water and vegetation are more plentiful in the jungle. So Asian elephants do not need wrinkled skin to trap moisture or large ears to fan their bodies.

### **Information and Facts About Elephant Babies**

Their trunks are also sensitive and dexterous enough to enable elephants to pick up objects of various sizes, judge their weight and composition, and in some instances even to fend off attackers (the flailing trunk of an elephant won't do much damage to a charging lion, but it can make the pachyderm seem like more trouble than it's worth, causing the big cat to seek out more tractable prey).

### **How Does an Elephant Use its Trunk? - ThoughtCo**

Most illegal ivory today comes from African elephants, with some 30,000 poached each year. Asian elephants, nonetheless, do still face the threat of poaching for the ivory trade.
